

Newly Qualified GP tries out 12 local practices and reduces admin using Network Locum

"As a newly qualified GP I wanted to experience working in different practices within my CCG before deciding where I'd like to work more permanently. Having discovered how straightforward it is to work flexibly through Network Locum I've now decided to become a portfolio GP."

- Dr Brennan, Portfolio GP

Challenge

Dr Brennan was finding locum work on her own to start paying off her student debts and it was proving to be very time consuming. In particular creating, sending and chasing invoices was a real hassle. She wanted something that helped her connect directly with employers whilst also eliminating administrative tasks.

Solution

Dr Brennan used the Network Locum "Billing" feature to generate, send and keep track of invoices. Her bank details were safely stored for future reference and all she needed to do was confirm the hours she worked.

Results

Practices worked at

16

Invoices automatically sent

38

Time saved

4hrs/week

Dr Brennan estimated that she used to spend at least 4hrs/week when she did this manually herself.

"The technology is impressive and so easy to use. I also like that I've been able to connect Penny Perfect with my Network Locum profile."
